Gunnar, everything on Dan's computer as well as his hard files were given over to Mike or Ned. If they don't have them, please check with Bill Eley at IT to see about retrieval.

Subject: Files from Dan Miller

Are files from Dan's computer available? Working on the Sesko/McConkey clean-up (Bremerton Gas Works) at the end of Pennsylvania and there are three documents we are looking for electronically. They are:

- Work Plan
- Community Relations Plan
- Fact Sheet

This would have been sent to Dan, he would have provided a cover sheet and submitted to EPA. Documents would have been developed by Kathleen Barrantes at Grant Solutions or Geo-Engineers. I do not believe going back to either of them for the documents would do us much good.

We have an extension on the grant, but it is based on us revising these documents slightly and returning to EPA. Otherwise, we can see if they will allow us to hand-modify a paper copy and submit.

Thanks, g.
